EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on 10/24/03, assigned serial 10/693261 and title "Two stage interacting multiple models filter for use in a global positioning system".

The prior art submitted on 3/1/04 has been considered.

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose: a method and a system for determining a dynamical quantity of a receiver of signals conveying information useful in estimating the dynamical quantity, method comprising steps: providing a single-point solution, by solving for the dynamical quantity of the receiver using a single-point solution having as an input; providing a first value of the dynamical quantity formed by combining one or more filter solutions each based on a different one of the motion models, the combining based on weights that take into account the likelihood of the suitability of each motion model, with the likelihood determined on the basis of agreement of the first value of the dynamical quantity compared with a second value of the dynamical quantity as indicated by a single-point solution (claims 1,6, and 11).

The prior art of record also does not disclose: a method and an apparatus for determining a dynamical quantity of a receiver of signals conveying information useful in estimating the dynamical quantity, method comprising: combining a plurality of filter solutions to provide a first value of the dynamical quantity using weights assigned to each of the plurality of filter solutions based on a predetermined procedure (claims 21,24, and 27).

Art Unit: 3661

After carefully reviewing the application and the additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

Claims 1-33, are allowable over the prior art of record.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 703-308-8223. The examiner can normally be reached on M-F (7:30 AM-5:30 PM), off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 703-305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
